Santorini is one of the Cyclades islands, in the southern Aegean Sea. It was devastated by a huge volcanic eruption in the 17th century BC, which shaped its rugged landscape and the famous caldera. The Venetians called it Santorini in reference to St. Irene, the name of a church on the island. The cube-shaped houses were not built at sea level, but whitewashed on the inner slope of the volcanic caldera, forming the two main towns: Thira and Oia. Both overlook the sea, the small islands to the west and the beaches of white, red and black lava stone. It is also one of the few places in the world that keep groups of cave houses on volcanic soil. Since the 1980s, many couples from all over the world have chosen it for weddings or honeymoons. The sunset, the minimalist architecture of the Cyclades, the rocky landscape and the volcano are the main features of the island.
